

DROID ERIS BY HTC

Update Available for Your DROID ERIS by HTC

Get the most out of your DROID ERIS with these OS enhancements.

Verizon Wireless is pleased to announce new software enhancements for your Droid Eris by HTC smartphone. The Droid Eris software version ROM:1.16.605.1/Radio:2.32.40.11.09 update includes numerous improvements and updates.

Enjoy enhanced performance on your Droid Eris with the following updates:

- While on a call and the device is in screensaver mode, pressing the End key now takes the device out of screensaver mode, and a second press will end the call.
- On-call mute and speakerphone icon functionality is enhanced.
- Upgraded functionality after activation eliminates the delay users were experiencing in receiving their first call.
- Device now switches effectively from 1x mode to 3G.
- Device no longer requires users to reselect a default email after power-cycling.
- SMS and MMS messaging delivery is improved.
- Eighty-character MMS/SMS message subject lines are now allowed.
- Improved picture messaging functionality allows messages from LG phones to be opened.

For step-by-step instructions on how to perform the download, please visit verizonwireless.com/droiderissupport.
